Program to explain the use of JavaScript Operators -(increment)

```html
<!DOCTYPE html>

<html>

<body>

<h2>JavaScript Operators</h2>

<p>In this example, y is incremented before it is assigned to x (pre-incremented).</p>

<p id="demo1"></p>

<p id="demo2"></p>

<script>

var y = 5;

var x = ++y;

document.getElementById("demo1").innerHTML = y;

document.getElementById("demo2").innerHTML = x;

</script>

</body>

</html>
```
